Jonas Butt

Senior .NET Developer | 28-12-1983 | Amsterdam, Netherlands
jonas@thecodearchitect.com | thecodearchitect.com | +31 6 4242 7313

Jonas is a Scrum PSD-I certified independent software developer specialized in developing web, cloud and mobile apps built using the Microsoft platform which integrate with Microsoft and non-Microsoft systems, services and technologies. Throughout his 8+ years of experience in software development and consulting Jonas has demonstrated a strong passion for developing well-crafted, reliable, user-friendly software on the Microsoft platform. Jonas continuously improves his programming and software design skills as well as his knowledge of web, cloud and mobile technology and architecture.

From 2008 to 2016 Jonas worked for Avanade as a software developer and consultant on projects that involve developing solutions using Microsoft products and technologies for global enterprise customers. Avanade is a joint-venture between Microsoft and Accenture. Jonas holds a Bachelor of ICT (Computer Science) degree from the Hogeschool voor Economische Studies (HES) in Amsterdam.

In his free time Jonas loves to travel the world with his girlfriend, spend time with family, watch movies and documentaries, visit festivals with friends and keep up with software technology.

Specialties:

- Software Development with .NET (Core) and C#
- Web Development with ASP.NET (Core) MVC, Razor, HTML, JavaScript and CSS
- REST API Development with ASP.NET (Core) Web API
- Database Development with Entity Framework, Dapper, T-SQL and SQL Server
- Cloud Development with Microsoft Azure and Amazon Web Services
- DevOps and ALM with Visual Studio Team Services and Atlassian
- Software Design and Architecture
- Agile, Scrum, Kanban, Reactive and Software Craftsmanship

Characteristics:

- Clean and readable coding
- Both quality driven and pragmatic
- Diligent worker
- Continuous learner and improver
- Easy to work with
- Trust and assertiveness

Experience

Senior .NET Developer [freelance] at RDC

2017 – present

Technologies used: C# 7, ASP.NET Core, Visual Studio 2017, Azure PaaS Components, Atlassian Tools, Slack

Senior .NET Developer [freelance] at funda

2016 – 2017

Jonas is contracted by funda to contribute to their .NET projects. Jonas works on an event-driven microservices architecture used for processing real estate data. Jonas has also contributed to the real estate portals (www.funda.nl, www.fundainbusiness.nl), the real estate agent portal called Funda desk (www.fundadesk.nl). While primarily focused on .NET back-end development Jonas is also involved with backlog refinement, code reviews, QA (testing) and deployments.

Technologies used: C# 7, ASP.NET MVC, .NET Core, ASP.NET Core, AWS SQS, Git (Git Flow, GitHub Flow), SourceTree, Docker, OAuth, Apache Solr, AFAS Connector, NuGet, Artifactory, Bamboo, Bitbucket, Jira, HipChat, Visual Studio 2017, ReSharper, DC/OS, Marathon, Swagger/Swashbuckle, Dapper, Entity Framework, JustSaying Message Bus, SQL Server 2016 among others.

Independent Software Developer at The Code Architect

2016 – present

Jonas is founder and owner of the Amsterdam based software company The Code Architect. The Code Architect offers software development and consulting services on independent contracting basis (freelance).

Senior .NET Developer at Transavia

2014 – 2016

This was Jonas' most recent client as consultant for Avanaade, where he worked on the e-commerce platform (www.transavia.com) and the API platform (developer.transavia.com). The following two sections describe Jonas' role in these projects.

Airline API and Integration Platform

Besides designing and implementing features for the Transavia API and Integration platform, Jonas went beyond this role in an effort to improve the maturity of the team and its development process, by:

- Taking the lead in setting up a Definition of Ready, Definition of Done and Definition of Released as a vehicle for needed improvements,

such user story quality and software development processes (CI, CD, peer review).

- Planning and hosting developer meetings to foster knowledge sharing, promote peer reviews and facilitate discussions.
- Documenting and presenting software design principles, which have quickly been adopted and embraced by all developers in the team.
- Working with a software architect from another team to setup continuous integration and a code quality dashboard.
- Taking the lead in the offshoring effort, by defining a developer profile and writing a plan which includes the risks and prerequisites. Jonas also created a programming exercise, reviewed candidate profiles, wrote interview questions and held interviews.
- Work on proof of concepts of innovative ideas, such as actor model programming, Akka.NET and the Reactive Manifesto, and documented and presented the findings to stakeholders (architects, other Scrum teams).

Technologies: .NET, C#, Entity Framework, T-SQL, SQL Server, Navitaire NewSkies SOAP APIs and databases, Apigee, ASP.NET Web API, Swagger, Akka.NET, SignalR, Jenkins CI, SonarQube, SpecFlow among others.

Airline E-commerce Platform

As developer in one of the Scrum teams of the Transavia e-commerce platform program, Jonas was responsible for the backend development of various features of the Transavia flight booking website (www.transavia.com) and the My Transavia portal. Features include the payment page, voucher component, travel insurance component and website analytics. Another responsibility was to integrate the backend code together with frontend code into the Sitecore CMS, setting up the content structure and ensuring features can be easily configured and the content can be managed and localized. For each two-week sprint, Jonas participated in and contributed to sprint planning, backlog refinement, code reviews, sprint review and sprint retrospective. For the monthly releases, Jonas contributed by merging code and resolving defects.

Technologies: ASP.NET MVC with Razor, Navitaire dotREZ framework, Sitecore, Team Development for Sitecore (TDS), Razi, MSTest with SimpleInjector, FakeItEasy and Should among others.

Consultant and Software Developer at Avanade

2008 – 2016

Jonas was software developer and consultant on projects that involve developing solutions using Microsoft products and technologies for global enterprise customers. Avanade is a joint-venture between Microsoft and Accenture.

Detailed information about Jonas' other projects for Avanade can be found in his full profile.

Certifications

- MCSD Web Applications, Microsoft, 2015
- Sitecore XP 8.0 Certified Professional Developer, Sitecore, 2015
- Delivery Management at Avanade I, Avanade, 2015
- Professional Scrum Developer I, Scrum.org, 2014
- Avanade Scrum Developer, Avanade, 2014
- MCP Programming in HTML5 with JavaScript and CSS3, Microsoft, 2013
- Professional Scrum Master I, Scrum.org, 2013
- MCPD Designing and Developing Windows Azure Applications, Microsoft, 2012
- MCTS WCF Development with .NET Framework 4, Microsoft, 2012
- MCTS Accessing Data with .NET Framework 4, Microsoft, 2012

Education

- Bachelor Bedrijfskundige Informatica at Hogeschool van Amsterdam
2005 – 2008
Minor: Software Engineering.
Weighted average grade: 8.3
This degree was obtained with honor / cum laude.
Initially the name of the school was HES Hogeschool voor Economische Studies.
- Bachelor Informatiekunde at Vrije Universiteit Amsterdam
2002 – 2004
This study was not completed.
- VWO Atheneum Economie en Maatschappij at Scholengemeenschap Reigersbos
1996 – 2002

Languages

- Dutch
native speaker
- English
near native / fluent
